

SUSTAINABILITY POLICY

Purpose and Scope

As Ak-taş Dış Ticaret AŞ, we work in accordance with our historical and close cooperation with major and leading petrochemical producers in the world and regularly supply a wide range of bulk and packaged petrochemical products to our domestic and foreign customers. Since our establishment, we have provided our supply, storage and sales services with trust, quality and meticulousness.

We are aware that we are in a period when the whole world should make joint efforts to ensure healthy continuity and sustainability of human existence with all elements of nature.

We conduct all our activities in accordance with our ethical principles and in compliance with applicable laws and regulations, with a holistic approach to corporate governance, transparency, sustainability and continuous improvement.

Our commitments

- We will embed our sustainability policy in our corporate culture and raise awareness among our employees and stakeholders;
- We will keep our stakeholders informed of material changes, recognising the importance of stakeholder communication in reducing our risks and building lasting relationships for the future;
- We will integrate a holistic risk management process into all our business processes;
- We will follow sustainability criteria in our supply chain and share sustainability awareness with our entire value chain;
- We will monitor all existing and/or emerging production technologies in different parts of the world to ensure supply chain continuity, and develop new alternative suppliers in addition to existing suppliers;
- We will respect human rights, promote equality, diversity and inclusion and ensure non-discrimination by providing equal employment opportunities;
- We will provide a decent, inclusive working environment and equal opportunities by considering the satisfaction of our employees;
- We will raise the awareness of our employees and stakeholders on issues such as sustainability, quality, environment, energy efficiency and occupational health and safety;
- We will calculate the emissions from our activities and take measures to reduce, verify and monitor them;
- We will maintain our sensitivity to the environment and nature with our investments and activities in the field of renewable energy;
- We will actively contribute to all efforts that are intended to prevent climate change;
- We will comply with the ten principles of the United Nations Global Compact;
- We will act in accordance with national and international laws, certificates and standards;
- We will communicate our sustainability policy effectively to relevant stakeholders, review it regularly and update it as necessary.

Implementation and Effective Date

This policy has been published on 23/09/2024 with the approval of the Board. It will be reviewed on an annual basis and updated as necessary. The current version of our policies will be communicated to all employees via email and published on the corporate website for relevant stakeholders.
